

# Now introducing: The AirBoom Cannula

From the company that brings you some of the fastest and highest flying planes in general aviation...

## Something to make flying them even more enjoyable!

\* Patent Pending

Tired of keeping hoses and cables straight? The AirBoom Cannula\* headset accessory offers comfortable oxygen delivery to 18,000 ft. without tangling of hose and cable. You can fly at flight level 180 with ease and comfort—as close to pressurization as you can get without wearing a bulky mask! The moist air/oxygen blend jet eliminates dry nose irritation while conserving oxygen.

The boom cannula is an approved Bose accessory and can be built into any Bose headset. It is FAA approved to 18,000 ft. and its anodized aluminum quality construction assures that it will stand the test of time.
